

DA-ST512
(Battery Replacement)
User's Manual

Battery Replacement Application

This application will reset the battery management system after battery replacement.

Battery Replacement Process

For vehicles that can have two batteries fitted the application will first give the user the option to select the main or secondary battery. Select one of the options to start the process or press the **X** button to return to the main application menu.

For vehicles that only have one battery fitted no options are displayed and the process starts automatically.

General Procedure

Please ensure the vehicle is in a safe working mode prior to exercising the following procedure.

- The process starts to run and the message "Please wait" is displayed on the screen.
- Once the application has successfully completed "**PROCEDURE COMPLETE**" will be displayed. If the value has been successfully read the vehicle battery time in service will also be displayed. Pressing the **OK** button will return to the main application menu.

Note: If the process fails for whatever reason, a failure message will be displayed. At this time the process should be repeated ensuring that all conditions for the process have been met.

- To abort the procedure press the **X** button on the keypad at any time.

Battery Replacement Model Year Updates

The software associated with the Battery Replacement application is updated periodically to increase its coverage for new JLR vehicles and model year updates. You can check for these updates by connecting your device to a PC via the supplied USB cable, and launching the DA App Hub. This tool will connect to the Diagnostic Associates file server and check to see if a newer version of the battery reset application is available to download.

Battery Replacement Supported JLR Vehicles

The following JLR vehicles and associated model years are supported by the Battery Replacement application at the time this user manual was produced. To obtain an up-to-date version of this table you should visit the Diagnostic Associates website.
