(Seat Calibration Application)

User's Manual

Seat Calibration Application

This application allows the operator to perform a seat calibration and on demand self test on the drivers, passenger and rear seats where supported.

On starting the application the menu will display the options available. The 'UP', 'DOWN', 'X' and 'OK' buttons can be used to navigate the menu.

Seat Calibration

The seat calibration will move the seat selected to the end stop of each axis available. Please ensure that the area around the seat is clear of any obstructions.

Once the application has successfully completed and all instructions followed correctly a message "**PROCEDURE COMPLETE**" will be displayed. Press the 'OK' button to return to the main application menu.

Note: If the process fails for whatever reason, a failure message will be displayed. At this time the process should be repeated ensuring that all conditions for the process have been met.

ODST

The On Demand Self Test will drive the seat along all axis and then display any DTC's generated. Please ensure that the area around the seat is clear of any obstructions.
On selecting the ODST the routine will run and then a list of DTCs present will be displayed. To view the description select the DTC using the 'OK' button. The 'X' button can be used to return to the first menu.

Note: If the process fails for whatever reason, a failure message will be displayed. At this time the process should be repeated ensuring that all conditions for the process have been met.

Seat Calibration Model Year Updates

The software associated with the Seat Calibration application is updated periodically to increase it's coverage for new JLR vehicles and model year updates. You can check for these updates by connecting your device to a PC via the supplied USB cable, and launching the DA App Hub. This tool will connect to the Diagnostic Associates file server and check to see if a newer version of the application is available to download.

Seat Calibration Supported JLR Vehicles

The following JLR vehicles and associated model years are supported by the Seat Calibration application at the time this user manual was produced. To obtain an up-to-date version of this table you should visit the Diagnostic Associates website.
